Portfolio

Profile

I am a Computer Engineering professional specializing in cybersecurity, with strong interests and practical experience in networking, technical support, data analysis, and software development. I am analytical, detail-oriented, and solution-focused, with a strong ability to troubleshoot technical challenges and develop reliable solutions. I value continuous improvement, teamwork, and effective communication, and I am committed to applying my technical knowledge to solve real-world problems and deliver high-quality results.

Professional Experience

I&M bank Sep 2021 – Feb 2022 | Kigali, Rwanda

Technical Support Specialist (Internship)

- I provided day-to-day technical support to employees, troubleshooting hardware, software, operating system, application, and network-related issues to minimize disruptions to their work.
- I diagnosed and resolved common technical problems, including slow computers, application errors, printer failures, Windows configuration issues, and network connectivity problems.
- I installed and configured computers, printers, scanners, software applications, and other IT equipment, including preparing workstations for employees.
- I assisted with user account and access-related issues, including password resets, basic permissions, system configuration, and application access while following the bank's IT security procedures.
- Whenever I could not resolve an issue at the first level, I collected the relevant information, documented the problem, and escalated it to the appropriate senior IT or infrastructure team instead of making unauthorized changes.

LG Energy Solution May 2022 – Aug 2025 | Wroclaw, Poland

Logistics Specialist Operator

- I prepared materials, components, and finished goods for internal movement and shipment, verifying quantities, product identification, labels, packaging, and required documentation.
- I performed quality and visual checks on materials and packaging, identifying issues such as damaged goods, incorrect labels, missing items, and quantity discrepancies.
- I used barcode-scanning and internal inventory systems to record material movements, verify product information, and maintain accurate stock records.
- I supported inventory control by conducting stock checks, organizing materials, locating products, and investigating discrepancies between physical inventory and system records.
- I coordinated with logistics, warehouse, quality, and production teams to ensure materials were delivered to the correct locations safely and within required timeframes.
- During busy production periods, I handled multiple logistics tasks under time pressure while maintaining accuracy and following established procedures rather than prioritizing speed at the expense of quality.
- I gained practical experience working in a large-scale manufacturing environment where accurate inventory management, traceability, teamwork, time management, and attention to detail were essential to daily operations.

Escola S.A Feb 2023 – Jul 2023 | Warsaw, Poland

E-Learning Content Developer (Internship)

- I supported the development of digital learning materials and educational content for online courses, making sure the information was clear, structured, accurate, and easy for learners to understand.
- I researched different technical, educational, and industry-related topics and transformed the information into structured learning materials, tutorials, exercises, and supporting resources.
- I reviewed existing course content to identify outdated information, unclear explanations, formatting issues, and inconsistencies, and suggested improvements where necessary.
- I managed multiple content-development tasks remotely, prioritizing assignments according to deadlines and maintaining consistent communication with the team.

Cognizant Sep 2025 – Present | Krakow , Poland
Data Operator

- I worked with structured and semi-structured data, reviewing, validating, and maintaining data records to ensure accuracy, consistency, and completeness across assigned processes.
- I used data analysis and validation techniques to identify inconsistencies, missing information, duplicates, and other data-quality issues, investigating the underlying causes and applying the appropriate corrections.
- I worked with large volumes of data and followed defined data-processing workflows to review, classify, update, and maintain information according to established quality and business rules.
- I monitored data-processing activities and investigated exceptions or irregularities, using analytical problem-solving to determine the appropriate resolution and maintain reliable data outputs.
- I collaborated with team members and stakeholders to clarify data requirements, resolve data-related issues, and ensure that processed information met defined quality, accuracy, security, and operational standards.
- I supported continuous improvement of data-processing workflows by identifying recurring issues, analyzing patterns in errors, and contributing to more efficient and consistent data-handling procedures.

Education

Akademia Techniczno-Artystyczna - Wydział Wrocławska Akademia Biznesu (ATA Wrocław) Mar 2022 – Sep 2025 | wroclaw, Poland
First Cycle Programme , Full-time (Major in Computer Engineering, in the field of Cybersecurity and Computer Networks)

TECHNICAL SKILLS

- **Networking & Security** — Network Routing & Switching, Cisco Networking, VLAN/VPN Configuration, Firewalls, IDS/IPS, Vulnerability Assessment & Threat Detection, SOC Analysis, OWASP Standards, Access Control & Encryption, TCP/IP & OSI Model, Network Monitoring & Troubleshooting
- **Programming & Development** — Python, Bash, JavaScript, SQL, REST API Development & Integration, Scripting & Automation, HTML5, CSS3, JSON
- **Tools & Platforms** — GitHub - Wireshark - MySQL - VS Code - Cisco Packet Tracer
- **Core Competencies** — Root-Cause Analysis, Incident Response, Technical Documentation, Cross-Team Collaboration
- **Cloud & Infrastructure** — Microsoft Azure, Linux Administration, Terraform (IaC), CI/CD Pipelines, Cloud Security & Monitoring

Certificates

- AI Augmented Engineering Lead LangGraph - Azure with GHCP
- Oracle Cloud Infrastructure Foundations
- CCNA: Enterprise Networking, Security, and Automation
- AI essentials: policy,governance and use

Projects

Africa Shield Cyber Centre
HTML, CSS, JavaScript, PHP
I Developed a cybersecurity operations platform featuring incident reporting, SOC monitoring, threat visualization, security awareness resources, and administrative authentication workflows.

Peakwise
Python, React, JavaScript, ML, FastAPI
I Built an AI-assisted mass-spectrometry tool that analyzes LC-MS/MS peak data, ranks candidate molecular structures, performs formula estimation, and supports similarity-based chemical identification.

STANS
TypeScript, React, OpenStreetMap, OSRM, Docker
I Developed a real-time traffic and routing dashboard using OpenStreetMap data, route optimization, geolocation, weather services, and graph algorithms.

Hamwe Tourism
React, TypeScript, Vite, GitHub Actions, HTML, CSS, JavaScript
I developed a full-stack-style tourism booking web application with tour catalogues, digital tickets, interactive maps, Rwanda information, booking workflows, QR passes, and an AI-style information assistant.

Our Money Hub
JavaScript/TypeScript, Web, HTML, CSS, JavaScript
I developed a responsive retail website with product categories, catalogue presentation, navigation, and an integrated location map for a local business.

NFL BOT
Flutter, Dart, FastAPI, AI
I developed a cross-platform AI wellness application with voice interaction, nutrition logging, fitness tracking, GPS activity tracking, hydration monitoring, sleep tracking, and personalized coaching features.

Interests

Technology & Innovation
Building personal projects and recreating existing applications and systems to strengthen my technical and problem-solving skills.

Sports & Fitness
Swimming, gym training, and playing basketball to maintain physical fitness, discipline, and an active lifestyle.

Events Community
Participating in technology meetups, workshops, and community events to learn, exchange ideas, and stay connected with the tech community.

Entertainment & Creativity
Playing musical instruments and gaming

Travel & Personal Development
Traveling, exploring new cultures, and engaging in personal reflection and development.

Declaration

I declare that all the information provided in this Curriculum Vitae is true, accurate, and complete to the best of my knowledge and belief. I confirm that the educational qualifications, professional experience, technical skills, certifications, projects, achievements, and other information presented in this CV accurately reflect my academic and professional background. I understand that any false, misleading, or inaccurate information may affect my application and professional consideration. I accept full responsibility for the authenticity and accuracy of the information provided and authorize its use for legitimate recruitment, employment, academic, or professional purposes.
